Agustin Zarate

Frontend developer
& UI Designer

Core Technologies:

- ✓ Javascript
- ✓ HTML / CSS
- ✓ Typescript
- ✓ React
- ✓ React Native | Expo
- ✓ Next.js
- ✓ NodeJS
- ✓ Tailwind
- ✓ CSS-in-JS
- ✓ Jest
- ✓ React Testing Library
- ✓ Figma

Others:

- ✓ UX / UI Design
- ✓ Design System
- ✓ PWAs
- ✓ Performance Optimization
- ✓ Scrum | Kanban
- ✓ GIT
- ✓ Responsive design

Soft skills:

- ✓ Communication
- ✓ Initiative
- ✓ Problem solving
- ✓ Adaptability

Professional summary

5 years of experience crafting scalable, maintainable, and high-performance applications. Strong background in fintech products and complex platforms, with expertise in large-scale refactors and scalable architectures. Experienced in mentoring teams and shaping frontend best practices.

Work experience

GlobalTask - Strategy — Frontend Engineer — August 2024 - July

Strategy is a London based investment solution provider that offers its clients access to the latest financial technologies, products, and insights from across the world.

- Built product status tracking through dynamic charts and enabled data export to Excel files for reporting.
- Collaborating with UX designers and researchers to inform the direction of products we craft.
- Built and maintained both server-side and client-side components to ensure the scalability and high performance of the application.
- Developed dynamic and large scale forms with complex validations that adapted in real time to create financial products.
- Code optimization.
- Code reviews.

Tech-stack: Next js, React js, Typescript, Context API, Zustand, Recharts, Next UI / Hero UI, Tailwind CSS, SCSS Modules, Socket IO.

Urbetrack — Frontend Engineer — January 2024 - July 2024

Urbetrack is an international company with over 20 years providing advanced software solutions, specialized consulting, and smart city technologies for governments and enterprises across Latin America.

I've worked developing a solution to track materials collected from major waste generators in Buenos Aires. Focused on improving efficiency and sustainability in urban waste management.

- Implemented strategies to improve performance and first loading.
- Developed a UI design system with PrimeReact and documented it using Storybook.
- Documented critical business logic to accelerate onboarding and reduce knowledge gaps.
- Enhanced product reliability by writing Playwright E2E tests and unit tests.
- Code reviews.

Tech-stack: React js, Typescript, Context API, Zustand, Jest, React Testing Library, Playwright, Prime React, Tailwind CSS, Storybook.

GOIAR — Lead Frontend Engineer & UI Designer — June 2022 - December 2023

At GOIAR, I had the pleasure of contributing to several projects, such as the development of digital wallets, a biometric identification processes for Buquebus, and an Intel advertising management platform.

Additionally, I conducted technical interviews for candidates on various projects and took part in building communities within the company, being elected by my peers as one of the three leaders of the frontend community.

- Mentoring engineers within and outside my team on best practices, performance and advanced patterns.
- Identifying gaps around the org-wide frontend infrastructure, drafting proposals and implementing solutions that improved maintainability and developer workflow.
- Led the migration from JavaScript to TypeScript to enhance code quality and catch bugs at compile time.
- Created a full set of Figma prototypes for a fintech digital wallet, ensuring a consistent and intuitive user experience.
- Code reviews.

Tech-stack: Figma, React js, React Native, Typescript, Context API, Redux, Redux Sagas, React Query / Tanstack Query, Jest, React Testing Library, Cognito, Ant Design, Tailwind CSS, Styled Components.

Worked on Yopit, a virtual wallet for businesses designed to simulate supermarket cash registers, where companies could create a main account and assign sub-accounts to managers. Responsible for frontend development of the web, mobile, and backoffice applications, implementing key features such as user authentication and token persistence, multi-language support, device linking, file management, data filtering, form validations, and mobile permission handling.

Tech-stack: React js, React Native, Typescript, Firebase, Redux, Redux Sagas, Prime React, Styled Components.

Education

System Engineering - Universidad Tecnologica Nacional Regional, San Francisco, Cordoba. Arg, January 2022

Certifications

- Backend with NestJS [Platzi - 2025]
- Figma - advanced design techniques [Platzi - 2025]
- Hexagonal architecture in frontend [Codely - 2023]
- Advanced Typescript [Codely -2023]
- CSS Architecture [Codely - 2023]
- Professional State Management with React JS [Platzi -2023]
- Scalable applications with Next JS [Platzi - 2022]
- Unit Testing | Jest and React Testing Library [Platzi - 2022]
